

## B500 BURNISHER

**VIRUCIDAL efficacy > 99.99%**

(According to EN 14476 - Medical Standard)

**The B500 professional burnisher allows to clean and renovate** (perfectly\*) all types of cutlery. Processing capacity: 60 to 80 pieces (depending on size). Specifically designed for the care and renovation of silver, stainless steel and other metals such as sterling silver, gilt, copper, brass, bronze, aluminum, gold, chrome, pewter, vermeil, etc.

\* Water hardness < 25°F is recommended.

***Cleaning and Renovation  
of your cutlery in a single operation***

### **THE ADVANTAGES :**

- ✓ Elimination of phases of :  
Pre-soaking / White vinegar / Désoxydation  
(For silver metal)
- ✓ Capacity: **60 to 80 pieces per cycle**
- ✓ Eco-friendly washing at low temperature
- ✓ Energy savings : water, electricity
- ✓ Space-saving, compact design

***Be proud of  
your cutlery***

## **Extending the life of cutlery**

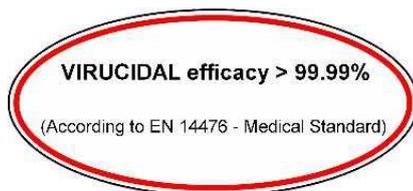

*The recovery of cutlery is simple and fast with the basket « Pick-up Cutlery »*

*Basket « Pick-up Cutlery »*

## **The advantages of INOVAG Technology's B500 BURNISHER**

### **► Cleaning staff :**

- Considerable reduction *in workload and difficulty (1 operation)*
- Elimination of the risk of burns by spraying fog at 85°C.  
The hot water of the network is sufficient
- Elimination of the steps of soaking, control, white vinegar, manual recovery and wiping
- Elimination of the use of desulfurization and/or deoxidizing products

### **► Dining room staff :**

- Cutlery clean and shiny (Removal of scratches after about 10 cycles)
- Homogenization of the aspect between cutlery (*Old and recent*)
- Impeccable hygiene
  - *Virucidal efficiency greater than 99% according to medical standard EN 14476*
  - *Reduction of the microbial load\* compared to a traditional washing with the improvement of the surface condition (\*studies conducted in partnership with the Ecole Nationale Supérieure des Arts et Métiers (ENSAM) and the Institut Pasteur de Lille)*

**“The Wave Effect” acts as a polishing (scratch removal)**
